

PROVIDER-GUIDED WEIGHT LOSS PROGRAM

GLP-1 Medications

Semaglutide & Tirzepatide for medical weight loss

SEMAGLUTIDE

GLP-1 receptor agonist

Originally developed for type 2 diabetes, Semaglutide is now widely used for medical weight loss thanks to its ability to regulate appetite, reduce cravings, and improve metabolic function.

BENEFITS

- Reduces hunger and increases fullness
- Supports consistent, sustainable weight loss
- Improves blood sugar & insulin sensitivity
- May reduce cardiovascular & diabetes risk
- Often improves energy, mobility & wellness

DOSING & DURATION

- Weekly subcutaneous injection
- Start low, titrate gradually as needed
- Dose adjustments guided by your provider
- Not every patient needs to dose-escalate
- Plan tailored to your goals & response

TIRZEPATIDE

GLP-1 + GIP dual agonist

A next-generation medication that mimics two natural hormones — GLP-1 and GIP — for dual-action appetite control, blood sugar regulation, and metabolic support. Many patients see more robust weight loss than with GLP-1 alone.

BENEFITS

- Powerful appetite suppression & longer satiety
- Enhanced blood sugar & insulin control
- Dual hormone support for metabolic efficiency
- Promotes steady, sustainable weight loss
- May improve cardiovascular & inflammation markers
- Often boosts energy, mood & lifestyle confidence

DOSING & DURATION

- Weekly subcutaneous injection
- Start low, body adjusts gradually
- Dose adjustments guided by your provider
- Titration schedule based on response & tolerability
- Plan tailored to your body's needs & goals

TRANSPARENT, PERSONALIZED PRICING

Your protocol is built around *you*.

Pricing depends on which medication your provider recommends and the dose that's right for you. Medication is priced separately from your visit and includes syringes, alcohol pads, and a starter sharps container. Office visits are billed to your health insurance when we participate; self-pay rates are available for patients who are uninsured or out-of-network.
